BY NEWSTAR

The best support for your AV & IT

Product overview

The continuous search for new trends and the development of new solutions have led to a large amount of new products in all main product categories, to complement the existing assortment.

Floor stands

Neomounts introduces various new **conferencing solutions** to the already wide range of floor stands and wall mounts. These mobile trolleys and wall mounts are suitable for screens up to 75 or 100 inch and feature, amongst others, a lockable hardware compartment, internal cable management with various in and out outlets and large 10 cm double caster wheels with brake. The FL50S-825 series consists of 2 manual adjustable floor stands, while the FL55-875 and WL55-875 series consist of motorised trolleys and wall mounts. A **videobar & multimedia kit** is optionally available and enables the installation of a separate universal cam shelf and multimedia device shelf to the trolley.

Desk mounts

The desk mount assortment is benefiting from several new additions, to complement the versatile assortment further. The three new ranges consist of full motion desk mounts for both single and double screens. The new high-end 950 design series offers the highest quality and design solution for **all screen dimension**; small and large, including 49" curved screens up to 18 kg. Another heavy duty series is the competitive 450 range; these full motion monitor arms have a practical handle with soft-touch grip and **100% plastic free packaging**, entirely made from cardboard and paper. Additionally, the **budget-friendly**, more basic 425 range is introduced; these full motion models have a clever space saving design with their short upper arms.

Wall mounts

The new heavy duty 950 series wall mounts have a **unique extendable design**, providing a wall mounting solution for displays from 55-110 inch and max 160 kg. Additionally, a complete **easy-install** wall mount range is shown, with fixed, tilt and full motion models, from the Neomounts and Neomounts Select product assortment. This range is specifically designed to give users the best experience possible; not only when using the mount, but also when installing it. Both these wall mounts and the heavy-duty models are quick and easy to install due to the included magnetic pull & release system, spirit level, fixing template and bolt box.

Pillar mounts

The new 910 pillar mount series offers a practical solution for the installation of screens to columns, without affecting the structure. The mounts are suitable for both **cylinder, square and rectangular** shaped pillars with a diameter between 25 and 100 cm. It is possible to lock the mounts using the included anti-theft screw or a padlock. The ratchet clamp ensures easy installation, while individual bracket height and level adjustment are available for the perfect installation.

Projector mounts

Several high capacity projector mounts, suitable for both standard and **sloped ceilings**, are presented at ISE. The mounts have four extendable arms instead of three, which make them even more **universally applicable**. The mounts feature an easy release system for quick one person installation and can be leveled, to guarantee the best viewing experience.

Ceiling mounts

The single and double screen ceiling mounts offer a practical solution for both standard and **suspended ceilings**. The full motion models can be adjusted to the optimal viewing position and a nifty cable management system conceals and routes cables from ceiling to screen. Additionally, the ceiling mounts can be adjusted in height.

Tablet mounts

A wide variety of universal tablet mounting solutions is shown; from countertop mounts to floor stands and wall mounts. Various models can be used in both **portrait and landscape mode** and have various inlay panels to suit different size tablets, extra casing space to store a charger and cable management. The casings are lockable and in addition, the mount can even be locked entirely to prevent theft.

More products

Additional mounting solutions will be presented at ISE, such as ergonomic laptop stands and compact phone stands. Furthermore, more **dedicated solutions** like medical wall mounts are on display too. Neomounts' comprehensive, up-to-date assortment of high quality mounting products offer a suitable solution for every situation.
